LIVESTOCK IDENTIFICATION TAG CEMENT

Ruscoe Livestock Tag Cement has been specially formulated to meet the rigid government specifications to maximize identification tag retention on animals processed through livestock sales barns. This ONE cement will do the job which previously required two different materials. Ruscoe Tag Cement will adhere well to animal hair when used in cold or hot temperatures.

Ruscoe Livestock Tag Cement is packaged in 5-ounce tubes for convenience in use and lowest possible cost to user. This material has excellent shelf life.

Order direct through your favorite livestock or veterinary supply distributor. Have them contact Ruscoe for information if currently not available in your area.
